

Rethink!

Ideas to cut down on use of disposable items!

Although plastic has many essential uses, throw-away plastic convenience items now threaten our waterways, beaches and sealife. We can greatly cut down on the demand for these items at little personal cost in money or convenience.

To cut down on these:

Single-use plastic or foam bottles and cups

Plastic shopping bags

Throw-away foam and plastic picnic gear

Use these:

Metal, plastic or glass water bottles and mugs

Cloth shopping bags

Durable, reusable picnic gear

Remember to REUSE or REPURPOSE throw-away items until they are worn out. Then RECYCLE them!
